Why Ozone?

A MENU MANAGEMENT APPROACH TO CLEAN WATER

Even though there is no proven effective replacement for Chlorine or Bromine in the disinfection process in swimming pools & spas, alternative treatments such as Ozone and UV can dramatically improve water quality with less sanitizers.

Whereas Chlorine and Bromine provide a measurable residual for the sanitization process, they are often unable to complete the water purification process on their own.

Frequently contaminants multiply too quickly for these sanitizers to effectively kill all the viruses, bacteria, and algae found in pools & spas.

Furthermore, after water is sanitized to be classified as “clean” water, the dead contaminants must be removed or oxidized.

SCALE AND METAL CONTROL

Great for Pool Startups!
Removes and helps prevent calcium scale and metal stains

got scale?

SC-1000 Scale & Metal Control is a non-phosphonic acid sequester formulated to control minerals and metals in the water. Use SC-1000 during initial fill-up of the pool, along with the Orenda App to balance the LSI of the water. Because SC-1000 is not phosphate-based, it does not conflict with phosphate removers like PR-10,000.

PHOSPHATE REMOVER CONCENTRATE

All-Natural formula removes phosphates on contact

PR-10,000 is the strongest, most concentrated phosphate remover available in the aquatics market. It is a rare-earth formula that reacts immediately with phosphates on contact. It crystallizes phosphorous, which then falls out of solution to be filtered out or vacuumed. PR-10,000 will cloud up the water for about 24-36 hours in the presence of high phosphates, but the cloudiness depends on the amount of phosphates in the water. Cloudiness is a normal part of the reaction. Watch videos on our website for more.

ENZYME + PHOSPHATE REMOVER

All-Natural enzyme formula reduces non-living organics and phosphates

CV-700 Enzyme + Phosphate remover improves water clarity and chlorine efficiency. The enzymes break down and digest non-living organic waste, which helps chlorine get through contamination and build a residual of free available chlorine for sanitation. Removing phosphates benefits chlorine too; phosphates weaken chlorine (HOCl to OCl^-). Visit our website to learn why.

ENZYME WATER CLEANER

All-Natural formula reduces non-living organics to create optimal water clarity

CV-600 Catalytic Enzyme Water Cleaner Concentrate is a unique, stabilized enzyme that effectively breaks down and digests organic contaminants commonly found in pools, spas and other recreational water. Routine application of CV-600 will positively maintain water clarity, directly address organic contamination, and boost chlorine efficiency.

CHITOSAN CLARIFIER + ENZYME

All-Natural clarifier with no synthetic polymers or dyes

CE-Clarifier+ Enzyme is a potent pool clarifier. The Chitosan attracts particles to be filtered out, while the enzymes break down and digest oils and other non-living organic waste.

HERE ARE 15 REASONS WHY

- 1** A LOOP-LOC cover is the only safety cover to be awarded UL certification year after year.
- 2** Mesh construction lets rain and melting snow drain right through.
- 3** LOOP-LOC is so durable, it's backed by a 15-year prorated warranty and so safe, it may reduce your liability insurance.
- 4** LOOP-LOC is so lightweight, putting it on and taking it off your pool is a snap.
- 5** LOOP-LOC blends beautifully into any backyard, with your choice of standard Spring Green or four optional designer colors.
- 6** LOOP-LOC's patented CABLE-LOC™ and GAPGUARD® Child Safety Intrusion Barriers close the gap created when a pool includes raised obstructions located at the cover's edge.
- 7** The polyester bonded thread used in LOOP-LOC covers is 30% stronger in thread size and produces a higher margin of safety in all seams (compared to our competitors).
- 8** Double-perimeter webbing and double-thick straps give our covers an incredibly high break strength.
- 9** We use extremely high-strength, non-corrosive 302/304 grade stainless steel springs for superior weight-bearing capacity.
- 10** Unique brass anchors recess flush with the deck when the cover is removed.
- 11** We sew the webbing to the cover using contrasting white thread, instead of black, to ensure that not a single stitch is missed.
- 12** We use 87% black yarn in our fabric for superior UV stability.
- 13** Chafe strips are manufactured with exclusively virgin material – not "regrind", which tends to stain decking.
- 14** Non-corrosive aluminum tips are double-notched for stability.
- 15** The large X-tacking on LOOP-LOC straps is sewn manually for precise placement and maximum strength.

LOOP-LOC is proud to introduce "IMAGE-LOC", the revolutionary way to measure covers with photos. Never A-B again! One person, one camera and following simple instructions will achieve highly accurate cover measurements.

THE BENEFITS ARE CLEAR.

Clearer, Cleaner Water

BrightLine™ quickly and efficiently removes particles as fine as 5 microns.

Longer Lasting

Since BrightLine does not breakdown like typical sand filter media, it can last up to 3 times longer.

Backwash Savings

Because BrightLine utilizes the entire filter bed and does not pack or channel, backwashing takes less time and is required less frequently, saving water and chemicals.

Less Media Required

BrightLine is 20% less dense than typical sand filter media, requiring less media to fill the same space.

Environmentally Friendly

Made from 100% recycled materials

Available in 40 lb. clear, plastic bags

For use in sand filters including those which specify #20 silica sand

BETTER THAN SAND.

ATTENTION TO EVERY DETAIL SATISFIES EVERY NEED!

Adding a high-end pool or spa reflects a desire for the good life. It's an investment that enhances lifestyle – an oasis of relaxation and recreation, accessible any time, right outside the door.

Today, pool and spa builders must promise fast heat-up and comfortable water temperature, available quickly and efficiently. The master builder's pool heater checklist also includes...

- Superior quality for trouble-free performance, backed by service-friendly design
- Attention to details for fast, easy installation to reduce labor and material costs
- Installation flexibility to work seamlessly with the aesthetics of the new pool or spa

Lochinvar® is the most innovative manufacturer of water heaters and heating boilers, serving the extraordinary demands of commercial buildings throughout the world. Our engineering excellence and commitment to understanding customer needs has produced EnergyRite®, the industry's most advanced pool and spa heater, for homeowners who want the best of everything.

**HOT PERFORMANCE,
COOL FOR THE ENVIRONMENT!**

EnergyRite heats up fast, saves money and helps conserve our natural resources with Low-NOx emissions that meet or exceed the most stringent "green" standards, anywhere in the country!

EnergyRite®
Pool & Spa Heater

HEAT UP FASTER!

Five EnergyRite models offer power to guarantee speed-heating for any size pool or spa...from 150,000 Btu/hr to an industry-maximum 400,000 Btu/hr. And Lochinvar's engineering delivers the highest thermal efficiency in its class. It's a combination that provides the industry's fastest heat-up time, and uses less energy so homeowners save money every time they heat their pool or spa!

THE FORMULA FOR THE FASTEST COMFORT HEAT-UP IS SIMPLE.

1. Provide enough heating power to raise water temperature quickly, on demand.
2. Engineered for efficiency, driving maximum heat into the water.
